Elementary Programming with C

Semester: 1

The Exam Code: 03

Duration: 90 minutes

Total Marks: 20

Practical Examination Paper

Do not write on this question paper and return it to the Invigilator after the examination.

Question 1: (2 points)

Write a C program that prompts the user to enter an integer and checks if it is positive, negative, or zero. Display the appropriate message.

Question 2: (2 points)

Write a C program that prints the numbers from 1 to 10 using a do-while loop.

Question 3: (2 points)

Write a C program that prompts the user to enter two integers and calculates their sum, difference, product, and quotient. Display the results.

Question 4: (2 points)

Write a C program that uses a switch-case statement to implement a menu with the following options:

Copy

1. Calculate the area of a rectangle
2. Calculate the area of a circle
3. Calculate the area of a triangle
4. Quit

The program should continuously display the menu until the user selects the "Quit" option. For each option, prompt the user to enter the necessary dimensions and calculate the corresponding area.

Question 5: (2 points)

Write a C function named "findMaxElement" that takes an array of integers and its size as parameters and returns the maximum element in the array.

Question 6: (2 points)

Write a C program to prompt the user to enter a sentence and count the number of words in that sentence. Display the count.

Question 7: (2 points)

Write a C program that prompts the user to enter a positive integer and checks if it is a prime number. Display whether the entered number is prime or not.

Question 8: (2 points)

Write a C program to reverse a given string. Prompt the user to enter a string and display the reversed string.

Question 9: (2 points)

Write a C program to sort an array of integers in ascending order using any sorting algorithm of your choice.

Question 10: (2 points)

Write a C program to calculate the sum of all the prime numbers between 1 and 100.
